Flavor Links

Yong-Yeol Ahn

Yong-Yeol Ahn, of [Harvard University](#) is this [flavor network](#) that works on the principle that similar flavors pair best (examples: cheese, or even the more experimental caviar). It's an attempt to figure out what flavors pair best. Read more at [Technology Review](#)

this material would be a perfect platform to space elevator. The cable would be extreme a electricity conductor. NASA would be at least than 18 billion, the cost of the current SLS things/people into space will drop dramatically

just a thought.

psciz
